PrestigePro™

RESPIRATORY & FACIAL PROTECTION CATALOG

2026

PRESTIGE AMERITECH

- **CERTIFIED DIVERSE** NMSDC-Certified Minority Business Enterprise (MBE)
- **ESTABLISHED** in 2005
- **ISO 13485:2016** Certified
- **FDA REGISTERED** Facility
- **DESIGNER & BUILDER** of Automated Manufacturing Equipment
- **IN-HOUSE** Product Development Team

ProGear® is our comprehensive line of **wholly domestic** surgical masks, N95 respirators, and other personal protection products all manufactured by Prestige Ameritech. Our short supply chain ensures continuity, reliability, and security.

With nearly 20 patents for masks and other PPE, innovation is what makes our ProGear® line unique.

Through our PrestigePro™ line, we offer a selection of **globally-sourced** facial protection products to meet the many needs of healthcare facilities.

They are designed specifically to deliver the protection you need, with the comfort you deserve — all at a lower cost.

ASTM F2100-23 STANDARDS

The American Society for Testing and Materials (ASTM) is an international standards organization that sets the guidelines for face mask protection in North America known as ASTM F2100. By meeting these standards with all our ProGear® and PrestigePro™ Surgical and Isolation Masks, you can be sure your protection is our top priority.

ProGear® and PrestigePro™ Surgical and Isolation Masks are offered in levels 1-3, with 3 being the highest level of protection. The current standards for face masks set out the following five protection criteria a mask must meet in order to be recognized as a 'rated' mask.

- **Fluid Resistance -** resistance of penetration to synthetic blood at one of three levels of protection (80 mm Hg, 120 mm Hg, 160 mm Hg).
- **Bacterial Filtration Efficiency (BFE) -** filtration ability when challenged with an aerosol that contains bacteria 3.0 microns in size
- **Sub-Micron Particulate Filtration Efficiency (PFE) -** filtration ability when challenged with sub-micron particulate matter 0.1 microns in size, representative of viruses
- **Delta P -** air flow from one side of the mask to the other to assess breathability
- **Flammability -** masks must meet Class 1 flame resistance requirements

ASTM F2100: LEVEL 1 BARRIER
80 mm Hg FLUID RESISTANCE

IDEAL FOR EVERYDAY USE OR WHERE THERE IS LOW RISK OF EXPOSURE TO SPRAY OR SPLASH.

ASTM F2100: LEVEL 2 BARRIER
120 mm Hg FLUID RESISTANCE

SUITABLE FOR PROCEDURES WITH A MODERATE RISK OF EXPOSURE TO SPRAY OR SPLASH.

ASTM F2100: LEVEL 3 BARRIER
160 mm Hg FLUID RESISTANCE

HIGHEST PROTECTION AVAILABLE. BEST FOR USE WHEN RISK OF EXPOSURE TO SPRAY OR SPLASH IS HIGH OR UNKNOWN.

MORE PROTECTION

Low Fluid

Light to Moderate

PROCEDURE MASKS

Earloop Masks with Oxafence

Ideal when virus inactivation is wanted

AV82030

ProGear® Mask with Oxafence

Wholly Made in America

Procedure Earloop

99.9% Inactivation of Tested Viruses*

Color	Packaging
Blue	50 EA/BX; 10 BX/CS

Indications for Use: The ProGear Surgical Mask with Oxafence is a single-use, disposable device used to cover the nose and mouth of the wearer to protect from transfer of microorganisms, body fluids and particulates. The outer layer of the face mask is coated with methylene blue (0.47 micrograms per square cm area).

*The ProGear Surgical Mask with Oxafence inactivates single isolates of the following test viruses after five minutes of contact with the treated surface of the face mask in laboratory (in vitro) tests under a lighting intensity of 500 ± 25 lux: Influenza A/PR/8/34/H1N1 (TC adapted, ATCC VR-1469), 3 log or 99.9% inactivation; Betacoronavirus 1 OC43 (ATCC VR-other viruses has not been evaluated. Correlations between in vitro testing results and any clinical event have not been evaluated.
