FM84210
Pro-80 Fluid Resistant Mask, Horizontal Tie
ASTM Level 1 Protection
300 masks per case

PROCEDURE MASKS

Oxafence® Active Protection Has Arrived

It's time for masks to inactivate viruses* rather than just trapping or shielding them.

The newest ProGear ASTM Level 3 Surgical Masks contain Oxafence Active Protection technology. Oxafence inactivates 99.9% of tested viruses* after 5 minutes.

99.9%
INACTIVATION OF TESTED VIRUSES*

AV82030

Surgical Masks with Oxafence, Earloop, Blue
ASTM Level 3 Protection
500 masks per case

Indications for Use: The ProGear Surgical Mask with Oxafence is a single-use, disposable device used to cover the nose and mouth of the wearer to protect from transfer of microorganisms, body fluids and particulates. The outer layer of the face mask is coated with methylene blue (0.47 micrograms per square cm area).

*The ProGear Surgical Mask with Oxafence inactivates single isolates of the following test viruses after five minutes of contact with the treated surface of the face mask in laboratory (in vitro) tests under a lighting intensity of 500 3 25 lux: Influenza A/PR/8/34/H1N1 (TC adapted, ATCC VR-1469), 3 log or 99.9% inactivation; Betacoronavirus 1 0C43 (ATCC VR-1558), 4 log or 99.99% inactivation; Feline Calicivirus F-9 (ATCC VR- 782), 4 log or 99.99% inactivation. Antiviral efficacy on other viruses has not been evaluated. Correlations between in vitro testing results and any clinical event have not been evaluated.

PROCEDURE MASKS

FM81000

Isolation Mask, Earloop, Yellow
ASTM Level 1 Protection

500 masks per case

FM81001
